MongoDB

Git & GitHub

REST API Development

Problem-Solving

Clean Code & Attention to Detail

UI/UX Awareness (Figma)

Team Collaboration

SUMMARY

Motivated and detail-oriented B.Tech CSE student (3rd year) with 3+ years of experience in front-end and full-stack JavaScript development. Skilled in React, Next.js, Node.js, and MongoDB, with a strong focus on clean code and building responsive, interactive web applications. Passionate about open-source development and currently exploring opportunities in AI-powered application development.

PROJECTS

macOS Portfolio Website

Frontend / Personal Project

• Developed a macOS-inspired portfolio website using Next.js and React with smooth animations, modular components, and a clean UI. Focused on responsive design, performance optimization, and modern UX patterns.

AI Chatbox Platform

Full-Stack + AI

• Created a full-featured AI chat platform with payment credits, one-on-one AI chat, text-to-image generation, and community chatroom. Developed a clean UI and integrated REST APIs, authentication, and smooth interactions.

DOM-based Snake Game

JavaScript / Game

• Engineered a classic snake game using pure JavaScript and DOM manipulation. Focused on game logic, realtime movement, and dynamic UI updates.
